---

### PROFILE

Backend-focused Java Developer with hands-on experience in building REST APIs and scalable server-side applications using Spring Boot. Skilled in designing database-driven solutions and implementing secure, high-performance backend architectures. Proficient in modern frontend technologies including React.js, Next.js, and JavaScript, enabling the development of responsive and user-centric web applications. Strong understanding of API integration, MVC architecture, and full-stack development workflows. Passionate about clean code, problem-solving, and delivering reliable, production-ready features.

---

### WORK EXPERIENCE

JAVA FULLSTACK DEVELOPER

**Locktrust Inc.**

*December 2024 - Present*

- Built and maintained REST APIs using Java and Spring Boot.
  - Integrated React.js / Next.js frontends with backend services.
  - Designed and optimized MySQL/PostgreSQL database queries.
  - Implemented JWT authentication and followed secure coding practices.
  - Fixed bugs, improved performance, and supported smooth deployment processes.
- 

### EDUCATION

**University**

2018 – 2021 (B.E.)

Dr. D. Y. Patil Institute of Engineering,  
Research & Management, Akurdi

### CERTIFICATIONS

- **React JS** Course to achieve Professional excellence by IntelliPaat
- **AI/ML – IIT Guwahati** (Pursuing)

### SKILLS

- Back-End  
Java , Spring Boot
- Front End  
React JS , Next JS , Java Script
- Database  
SQL (intermediate )
- AI/ML by IIT Gohati (Pursuing )  
Python, NumPy, Pandas, Matplotlib
